

Premium edge protection for high load industrial pavements.

Now featuring Rip-A-Strip™

Enhanced

Hyper ArmourMate™ Expandable™ is here.

Why choose Hyper ArmourMate Expandable?

- Protects concrete slab edges from spalling.
- Designed for high load materials handling traffic.
- Ideal for external industrial pavements where high temperature variation is a consideration.
- Fitted with 10mm closed cell foam for thermal expansion.
- Includes Rip-A-Strip™ capping for clean sealant preparation.
- Supports easier future joint repairs.
- Patented Control Barrel assists with alignment and movement control.
- Twist-N-Lock Stake Bracket system supports

Hyper ArmourMate Expandable is designed to protect concrete slab edges from spalling while allowing for thermal expansion in demanding industrial environments.
