

New Innovation. Same Trusted WavePlate™ System.

Introducing a step forward in joint system technology-enhancing performance without changing what you already trust.

Enhanced Design Features:

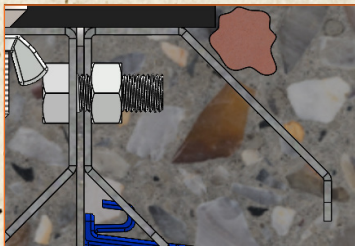

Flush Top Plate

Enables smooth, uninterrupted concrete finishing.

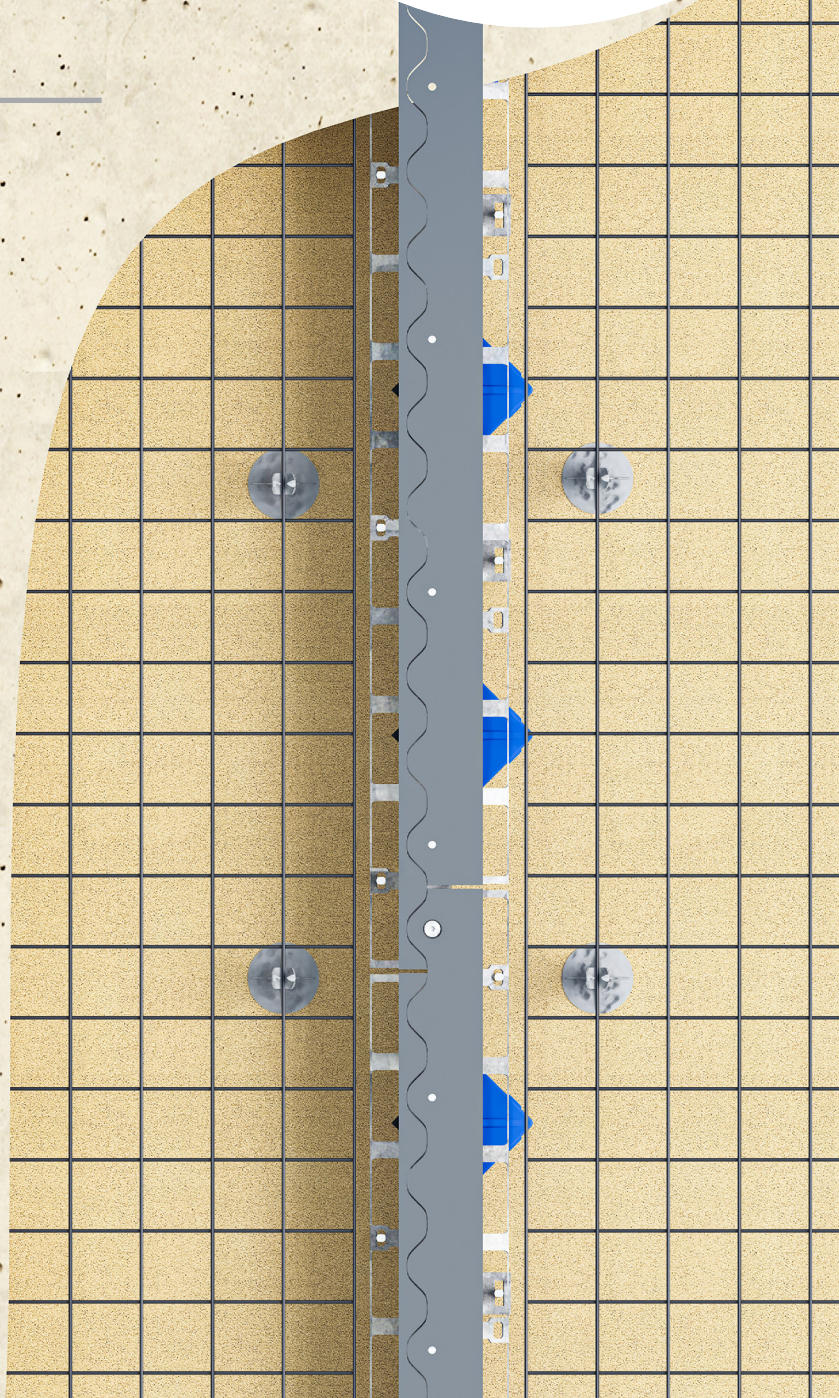

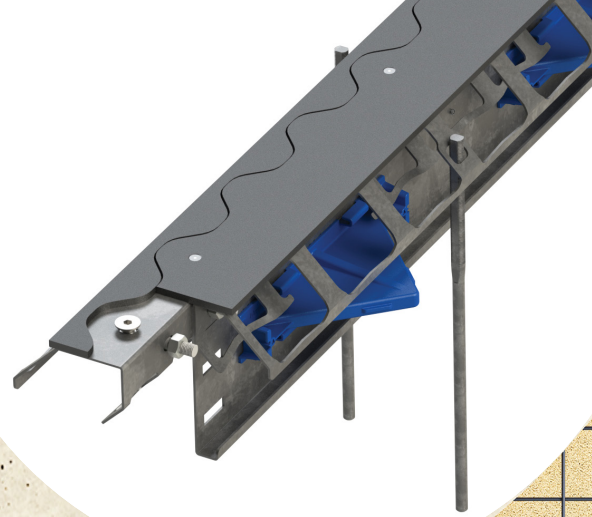

Advanced Lateral Movement

4mm defined joint end gaps prevent joint binding laterally while 2.5mm gaps either side of the teeth provide additional early lateral movement for irregular slabs.

Improved Aggregate Compaction

More consistent concrete compaction by allowing 20mm aggregate up to both top plate edges.
